

Has this file been identified as malicious? Explain why or why not.

- Yes, this file has been identified as malicious.
- VirusTotal shows that 59 out of 72 security vendors flagged the file as malware. The community score is negative, meaning analysts also agree it is unsafe. Sandbox analysis confirmed suspicious behavior, including creating unauthorized executables, modifying registry Run keys, and attempting to contact external domains and IPs. These findings, combined with its association to the Flagpro malware family linked to the BlackTech threat group, clearly confirm that the file is malicious.

TTPs

- Runs malicious commands (Execution)
- Adds registry keys for persistence (Persistence)
- Downloads extra payloads from the internet (Command and Control)

Tools

- No third-party tools identified; malware relies on Windows built-in functions.

Network/host
artifacts

- Dropped file: `C:\Users\Public\temp\svchost.exe`
- Registry key: `HKCU\Software\Microsoft\Windows\CurrentVersion\Run`

Domain names

- `org.misecure.com`

IP addresses

- `207.148.109.242`

Hash values

- MD5: `287d612e29b71c90aa54947313810a25`
- SHA-1: `8f35a9e70dbec8f1904991773f394cd4f9a07f5e`
- SHA-256: `54e6ea47eb04634d3e87fd7787e2136ccfbcc80ade34f246a12cf93bab527f6b`
